Clinical trial services

Since 1993, Hammersmith Medicines Research (HMR) has supplied industry-leading services for phase 1 and early phase 2 clinical trials. We offer a full service, including laboratory, pharmacy and radiopharmacy, from trial design to final report.

We specialise in:

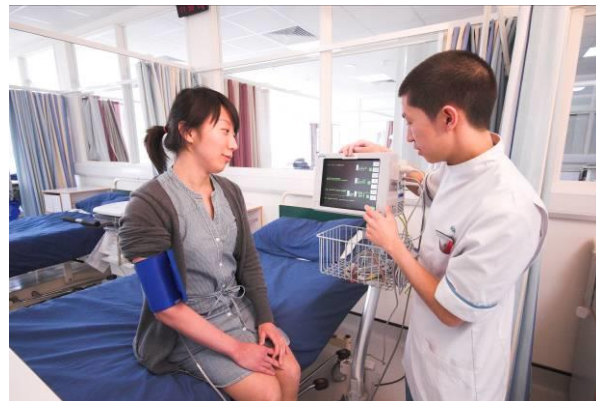

- First time in human studies
- 'Umbrella' protocols
- Dose-escalating studies
- Drug-drug interactions
- Special populations: elderly, post-menopausal, genetic polymorphisms
- Bridging studies
- ADME
- Microdosing
- Thorough QT studies
- Positron emission tomography
- Biological products
- Some early phase 2 studies

First-class facilities

- Purpose-designed facilities with 145 beds
- Central monitoring
- ECG telemetry
- Specialist procedure rooms – allergy, endoscopy, cognitive function
- 8 self-contained suites for sleep studies
- Urine-collection laboratory with integrated toilets
- Facilities for handling radioactivity
- Segregated outpatient unit
- Designated facilities for monitors and auditors
- Electronically-controlled access to all areas

Volunteer safety is paramount

- Detailed risk assessment of each study
- Alarms at every bedside
- Resuscitation team 24/7 and resident doctor
- Regular emergency scenario training
- Rapid patient evacuation
- Close to hospital acute services
- Approved by Resuscitation Council for ILS training
- Created the over-volunteering prevention database, www.tops.org.uk

State-of-the-art accredited laboratory

- Pneumatic sample transmission
- Automated sample processing and storage
- Safety pathology
- Biomarkers
- External quality assurance schemes
- CAP accredited
