Medicines Research**

www.hmrlondon.com

Since 1993, Hammersmith Medicines Research (HMR) has supplied industry-leading services for early phase clinical trials. We have extensive experience in administration of radionuclides.

Radiopharmacy

- On-site radiopharmacy with aseptic suite
- Licensed to manufacture capsules, and sterile or non-sterile solutions and suspensions
- QC of specific activity by LSC
- Secure IMP storage, with continuous environmental monitoring and integrated alarm

Wards

- Separate wards for conventional and 'light label' doses of radionuclide
- Urine/faecal collection and processing suites

Laboratory

- Dedicated area for processing radioactive samples
- Homogenisation and oxidation of faecal samples
- LSC
- uHPLC

Supporting services

- Excellent recruitment and retention of volunteers
- Dedicated project manager and clinical team
- Regulatory and ethics applications and advice
- Full data management, statistics and medical writing capabilities
- Japanese-speaking ward staff for bridging studies

Our collaborators

- PET: Imanova, a state-of-the-art unit at Hammersmith Hospital, which is nearby
- API synthesis to GMP: Selcia
- Accelerator mass spectrometry: Xceleron
