Medicines Research**

www.hmrlondon.com

Since 1993, Hammersmith Medicines Research (HMR) has supplied industry-leading services for early phase clinical trials. We have long and extensive experience in administration of radionuclides.

Radiopharmacy

- On-site radiopharmacy with aseptic suite
- Licensed to manufacture capsules, suspensions, sterile or non-sterile solutions
- On-site QC of specific activity by LSC
- Secure IMP storage, with constant environmental monitoring

Wards

- Separate wards for conventional and 'light label' doses of radionuclide
- Urine/faecal collection and processing suites

Laboratory

- Dedicated area for processing radioactive samples
- Homogenisation of faecal collections
- Sample oxidiser
- LSC
- uHPLC

Supporting services

- Dedicated project manager and clinical team
- Regulatory and ethics advice and applications
- Excellent recruitment and retention of volunteers
- Full data management, statistics, and medical writing capabilities

Our collaborators

- PET: Invicro, a state-of-the-art imaging unit at nearby Hammersmith Hospital
- API synthesis to GMP: Pharmaron
- Accelerator mass spectrometry: Pharmaron
